

Introducing Carlube ATF-LV

Innovation, Technology, Design

High performance ATF Low Viscosity Fluid for European, Asian and North American Vehicles

Tetrosyl's market-leading multi-vehicle Automatic Transmission Fluid (ATF) for low viscosity applications, Carlube ATF-LV, delivers premium performance in a wide range of automatic transmission passenger car models. This proven technology simplifies your customers' business by eliminating the need to stock multiple automatic transmission low viscosity fluids for use in multiple vehicles.

Premium Quality

Carlube ATF-LV helps protect the latest automatic transmissions and is designed to enhance fuel efficiency. Carlube ATF-LV is compatible with vehicle manufacturers recommended Automatic Transmission Fluids in European, Asian and North American vehicles.

Carlube ATF-LV complements our range of transmission fluid products, maintaining the quality our customers have come to expect of our Carlube ATF-Q, Carlube ATF-Q3, Carlube ATF-U and Carlube CVT-U.

Customers using Carlube ATF-LV will benefit from having a premium ATF which can be used on a wide variety of automatic transmissions; having been specifically designed to enhance fuel efficiency, through its unique low viscosity formulation.

Worldwide Applications

Carlube ATF-LV is universally suited to an extensive range of vehicles including Honda, Hyundai, Mitsubishi, Nissan, Saab and Toyota. Carlube ATF-LV also meets the requirements of Dexron® VI and recognised Japanese standard JASO 1-A.

Proven Performance

Tested in both the laboratory and in the field, Carlube ATF-LV offers the following benefits to the end consumer:

- Enhanced Fuel Efficiency
- Reduced maintenance costs
- Improved transmission life
- Improved vehicle performance

In addition, Carlube ATF-LV has provided the equivalent performance to the Toyota WS specification in a 100,000 mile field test with Toyota Prius vehicles; further reinforcing the quality of our Automatic Transmission Fluid for low viscosity applications.

Sun Gear from Toyota Prius showing no wear after 100,000 mile field test.

Exceptional Range of Passenger Car Applications

Carlube ATF-LV is targeted for your customers' business needs – giving them the ability to service a wide range of ATF passenger cars designed for low viscosity applications, with one fluid. Tested in both the laboratory and real-world field experience, Carlube ATF-LV delivers premium performance in a comprehensive range of passenger car models.

The vehicle manual will specify what oil should be used. The customer should check the extensive list of specifications below to confirm if Carlube ATF-LV is suitable:

Passenger Car Genuine Oil Specifications Covered by Carlube ATF-LV

Specification Name	Carlube ATF-LV
DEXRON® VI	Meets
JASO 1-A	Meets
Aisin Warner AW-1	Suitable
Honda DW-1	Suitable
Hyundai/Kia SP-IV	Suitable
Hyundai NWS-9638	Suitable
JWS 3324	Suitable
Mitsubishi SP-IV	Suitable
Mitsubishi ATF J2	Suitable
MB-Approval 236.12 & 236.14	Suitable
Nissan Matic-S	Suitable
Saab 93 165 147	Suitable
Toyota WS	Suitable

Carlube ATF-LV premium performance technology designed to make your business less complex and deliver added value.
