Highlights

Philips Krypton bulb

A miniature bulb in which Krypton gas is used to increase the light output up to 70% more than a standard bulb.

Pre-focused beam

Thanks to a pre-shaped lens and/or reflector the beam provides the most optimal light output and focus.

Shock resistant

A special shock resistant plastic or rubber housing prevents damage to your flashlight caused by shocks.

Water resistant

Water resistant to use in all weather conditions

Anti-roll bar

A special shape in the housing of the lamp makes sure it will not roll away on a sloping surface and thus keeps your flashlight always close at hand.

Nylon strap

This strap makes the flashlight easy to carry around and prevents it from falling if it accidentally slips out of your hand.
