Highlights

3 * (5MM) Nichia LED

Due to the low energy consumption of the LED, the flashlight can be operated for a longer time.

20 times longer operating time

LEDs consume much less energy than incandescent bulbs, so your batteries will last up to 20 times longer, saving you money on replacement of batteries.

50,000 hours LED life

Light source replacement is unnecessary due to the extremely long LED life.

Innovative LED technology

A Light Emitting Diode (LED) is an energy efficient improved lighting technology.

Pre-focused beam

Thanks to a pre-shaped lens and/or reflector the beam provides the most optimal light output and focus.

Splashwaterproof

Rubber sealing rings and housing prevent that water causes damage to the flashlight and allow you to use it in all weather conditions.

Oil and grease resistant

A rubber housing with special coating to protect the flashlight from oil and grease.

Shock resistant

A special shock resistant plastic or rubber housing prevents damage to your flashlight caused by shocks.

Nylon strap

This strap makes the flashlight easy to carry around and prevents it from falling if it accidentally slips out of your hand.

2x ExtremeLife AA included

The Philips batteries that are advised for the product are enclosed in the packaging to make immediate use possible.
